

Dear Scholars,

We miss you all so much! It is so wonderful to see you all of your work every day. We love knowing that even though we are not in school, you are still being responsible leaders and growing your brains every day! We will not be in our classroom for the rest of this year, but we are still a crew and each of you are getting ready to be second graders in a few short months! Our work may start to look a little different. From now on we are using happynumbers.com to do our math. This is so all of you can work at your own learning pace every day and for your teacher to see where you're struggling and excelling. We are also adding in expedition just like we do at school! Following this schedule will help you AND watching your teachers' video will help with any questions you may have! Send us pictures, we are so excited to see your work!

Love,

Your Teachers

Do your best to make the drawings as similar as possible in size and detail. Once you have drawn your kitchen item four times, pick one color that you see on the label and use that color for one part of each of the four drawings (like the brand name on the label).
